

# BABCOCK UNIVERSITY TEACHING HOSPITAL (BUTH)

# Background

- Babcock University Teaching Hospital (BUTH) is a Seventh-day Adventist health institution established to achieve the total healing of man by extending the healing ministry of our Lord Jesus Christ
- Has a mission to **ensure holistic medical care through quality services** and the vision to **be a worldwide teaching hospital of excellence**
- The hospital offers a 24hours medical services. BUTH has 21 Departments, 9 Wards and 400 Medical staff. With daily average load of 168 in-patient and 178 out-patient.

# Notable Achievements

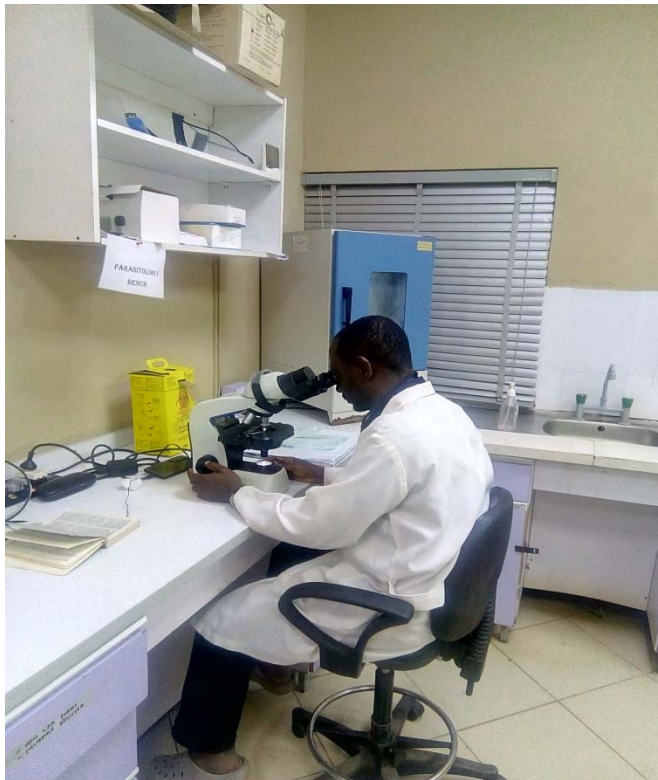

## 1. Improvement on Infection Prevention and Control at BUTH for adequate control of Covid-19 infection

- 10-bed isolation center was set up within the existing hospital premises
- 68 suspected Covid-19 patients were admitted into the isolation center so far
- 21 (30.9%) of these patients were Covid-19 positive
- The mortality rate was 4 (19.0%)
- This low mortality was possible because of the quality services of the institution.
- Another 35-bed isolation center was set up for the management of Covid-19 positive patients in the University. These also serve as ready isolation center for returning Babcock University students who may test positive for Covid-19
- 26 BU students tested positive to Covid-19 during the general screening of the students and were admitted to the 35-bed isolation ward where they were successfully managed without mortality.

## 2. Babcock University Teaching Hospital Molecular Laboratory

- A well equipped Molecular Laboratory and tissues culture center was set for prompt testing of samples from suspected Covid-19 patients.
