Project Name/Focus:	Reducing the waiting time in outpatient department	Start Date:	
Team Leader:	Dr.Reeta	End Date:	

LOMA LINDA UNIVERSITY HEALTH

PROBLEM/NEED WHAT ARE WE TRYING TO ACCOMPLISH?

- I. patients are frustated due to lengthy time
- 2. patients refuse to stand in queue's
- 3. poor patient satisfaction
- 4. decrease in patiens flow amning to OPD consultation

AIM HOW WILL WE KNOW THAT A CHANGE IS IMPROVEMENT?

- 1.To improve empolyee satisfaction as well as customer satisfaction
- 2. To align the customer demands
- 3. To reduce the waiting time and raising patient satisfaction
- 4. To provide timely care and reduce harmful delays

BRAIN STORMING WHAT CHANGE CAN WE MAKE THAT WILL RESULT IN IMPROVEMENT?

- 1. conduct a study on the average lenfht od waiting times
- 2. Assess changes in levels and trends of waiting time before and after interventions
- 3. stenght the association between waitinf time and patient satisfactions
- 4. Increase number of registration counters
- 5. Recruitment of additional staff

ROOT CAUSES CURRENT PROCESS REVIEW - Isolate the root causes Materials **Process/Methods** Unavailability of Online Nobody to assist the patient payment system to fill registration form No assistants to take weight No Quality Indicator for tracking **Problem Statement** and height No Biometric system for tracking docors time No defined time period Reducing the waiting time in outpatient department HIS system hanged Limited no.of qualified doctors unexpected leave by faculty &staff Errors in typing wrong billing during Difficulty in finding the counter' registration Late arrival of appointed Unavailability of wheel chairs? People **Machines**

PLAN

- To Create a OPD Dashboard for tracking Waiting time
- 2 To analyse the data for average waiting time on weekly basis
- 3 Maintain a register for in & Out of doctors
- 4 Purchase of Swipe machines for quick payments
- Look for more space to start extra counters for registration
- Allocate security Personnel for guiding and managing the patients at OPD
- Engage patients by screening Health Information & Provide handouts for
- ' reading
- 8 Implement patient satisfaction surveys ,measured by having rating scale of 5, 4, 3, 2, and 1

4	Recruitment of Security Personnel	HR Dept	6.2.2020	
5	Prepare material for screening health information	IT Dept	5.2.2020	
6 Prepare handouts for reading		OPD Supervisor	10.2.2020	

STUDY

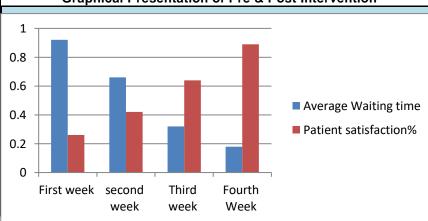

Target	Results	Eval
A QIP is done by measuring the exact time of registration in computer system and exact time of doctor consultation for a period of 4 weeks and the study was done for all patients arriving at OPD.	The monthly average waiting times for consultations before and after the respective interventions is given iin below Graph. The waiting times in first week was from 92%. The post intervention waiting time decreased from 92% to 18%.	Analysis results shows that, prior to the interventions on waiting time for consultations in Mrach 2020,the trend of the monthly average length of waiting time for consultations declined.

The OUTpatient satisfaction survey was conducted on the waiting time for consultation using Likert scale

We analyzed the changes in levels and trends of waiting times for consultations. In the initial weeks the percentage was 26% and gradually increased to 89%

There was an increasing patient satisfaction level in redicung the waiting time for consultations
